

NANOCOMP

FLEXIBLE LIGHT GUIDING

Roll to roll production is the spearhead of modern production technologies. Nanocomp is the pioneer in roll to roll mass production of film components for micro- and nano-optics.

OPTICAL COMPONENTS FOR

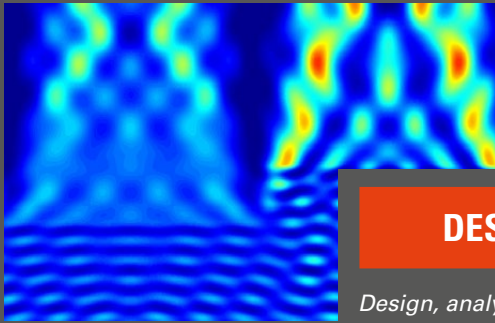

Nanocomp Ltd is a high-tech company with 20 years of experience in the field of diffractive optics. Nanocomp provides versatile solutions for global customers focusing on design, tooling and mass production of thin foil optics.

Nanocomp Oy Ltd
Ensolaantie 6, FI-80710 Lehmo, FINLAND

NANOCOMP

NANOCOMP PRODUCTION FLOW

DESIGN

Design, analysis and simulation of diffractive optics

PATTERNING

Patterning of nano- and micro structures

TOOLING

Production of nickel stampers through electroforming

PRODUCTION

Pioneer in efficient roll to roll production

CUTTING

*Die cutting
Laser cutting*

INTEGRATION

Thin foil enables variety of integration methods:

injection molding / in mold labeling, glueing, lamination, heat stacking, ultrasonic welding
